

Farnborough International Airshow (FIA) is offering fantastic opportunities for UAS stakeholders at this year's show. Can you really afford to miss out?

FREE UAS Seminar Programme, Indoor Flying Display and Advice Clinic

Farnborough International Airshow is an excellent opportunity for the UAS community to come together under one roof to hear from experts that will advise on UAS Regulations and Best Practice and see some very interesting UAS vehicles take flight –indoors! Aurora Flight Sciences, Air 2 Air and Bonningtons Surveyors will all be participating in the flying displays between 10:00-16:00 with their exciting UAS vehicles – please see overleaf for the flying timetable.

We are also extremely fortunate to be working with the industry's premier light UAS organisation, EuroUSC™, which is now Europe's leading authority on light UAS operations and airworthiness (CAA approval DAI/9932/09) for systems up to 150 kg.

During the week, Andre Clot, the EuroUSC™ Centre Director, and his team will be giving regular presentations on developing safe and cost effective commercial UAS operations based on the latest regulations from the CAA (please see overleaf for the schedule). Manufacturers, Distributors, Operators, and Pilot qualification programmes run by EuroUSC™ will be discussed.

EuroUSC™ are sponsoring a drop-in advice clinic each day of the show between 12:00 and 16:00, which is your opportunity to ask questions and get clarification on different aspects of UAS operation including Insurance and its Manufacturers, Distributor and Operator programmes. Also you can find out about the new BNUC-S™ crew qualification.

We very much hope you are able to join EuroUSC™ and receive the vital information and expert advice you need to assist you in progressing your UAS business in this fast growing sector. Email admin@eurousc.com to specifically book a clinic slot so that you don't miss out.
