

FREE Advice and Flying Opportunities!

Farnborough International Airshow (FIA) is offering two fantastic opportunities for UAS stakeholders at this year's show – can you really afford to miss out?

Drop-in UAS Advice Clinic and Presentation - EuroUSC - Hall 3, Stand D19a

Farnborough International Airshow is an excellent opportunity for the UAS community to come together under one roof to hear from experts that will advise on UAS Regulations and Best Practice.

We are extremely fortunate to be working with the industry's premier light UAS organisation, EuroUSC™, which is now Europe's leading authority on light UAS operations and airworthiness (CAA approval DAI/9932/09) for systems up to 150 kg. During the week, Andre Clot, the EuroUSC™ Centre Director, and his team will be giving regular presentations on developing safe and cost effective commercial UAS operations based on the latest regulations from the CAA. Manufacturers, Distributors, Operators, and Pilot qualification programmes run by EuroUSC™ will be discussed.

EuroUSC™ are sponsoring a drop-in advice clinic each day of the show between 12:00 and 16:00, which is your opportunity to ask questions and get clarification on different aspects of UAS operation including Insurance and its Manufacturers, Distributor and Operator programmes. Also you can find out about the new BNUC-S™ crew qualification.

We very much hope you are able to join EuroUSC™ and receive the vital information and expert advice you need to assist you in progressing your UAS business in this fast growing sector. Email admin@eurousc.com to specifically book a clinic slot so that you don't miss out.

UAS Indoor Flying Display Area

Display your Unmanned Aerial Systems within a purpose-built indoor display area at this year's show (the first of its kind at a UK Aerospace exhibition).

This dedicated area consists of open flying space, as well as a UAS obstacle course. Surrounded by netting, the area will ensure that you can demonstrate the capabilities of your systems in a safe, controlled environment. The demonstration area measures 15m long x 9m wide x 6m high and is located in the popular exhibition hall 3. Seats surrounding the display area will encourage visitors to stay and watch the displays throughout the day; we also anticipate a high level of interest from international media. Flying will take place between 10:00 and 12:00 daily.

Our FREE UAS display package includes:

- Pre-show test flight period 17-18 July
- 30 minute flying display on each day of the show (timetable to be confirmed)
- 2 complimentary Exhibitor Passes

In 2008, FIA attracted over 130,000 trade visitors, and over 150,000 public visitors. What better way to showcase your technology than to operate live demonstrations in front of a specific trade audience, as well as capture the imagination of the public.

If you have any questions on any of our UAS opportunities, or if you would like to apply for indoor UAS flying, please contact:
